Suitable Mortise

Single Latch

5050 Mortise

Dimension

1. There are smart phone, PIN code, RF Key card, fingerprint and mechanical key for your choice. (Smart phone unlocking is based on adding WIFI module).
2. Enable the auto lock function, it will lock automatically after 4 seconds by default. You also can set your auto lock time between 3 and 30 seconds if necessary.
3. Comes with the Connect Wi-Fi module (TUYA) so there's no additional hubs needed and it works off your home Wi-Fi.
4. Powered by 4 AA alkaline batteries approximately 1 year with 10 times operations daily.
5. Scramble code supports you enter random digits before or after the correct access code.
6. The lock can be energized with a power backup when you forget to replace the batteries.
7. Only master code can unlock the lock when indoor electronic double lock switch is activated.

<i>Parts</i>	<i>Specification</i>
Working Temperature	Inner body 5°C, Outer body -30°C
Door Thickness	1-3/8" to 2" (35mm to 50mm)
Finish	Matt Black

Key Card	99 User Key cards
Latch	Adjustable backset 2-3/8" to 2-3/4" to fit all standard door preparations
Battery	4 AA alkaline batteries, Last up to 12 months(10 times used a day)

TTLock

1. It has five access solutions, Blue key, Fingerprint, RF Key card, PIN code and mechanical key for your choice
2. Allow users to configure and unlock the lock via mobile phone.
3. For emergency, it can also be unlocked with a mechanical key
4. A continuous “beep” sound during door access will alert you to replace batteries.
5. Scramble code supports you enter random digits before or after the correct access code.
6. Connecting between Wifi network and the locks by a Gateway can fulfill multiple operations when the owner is far away from home. Like browsing the access record, unlocking and amending the valid time of pin-codes, etc. This is way more flexible to manage the access for the owner that has houses to rent out.

<i>Parts</i>	<i>Specification</i>
